

Resilient Shield Consulting

Innovative solutions for demanding clients

## Consulting offer

### Light Assessment of the Business Continuity Management System

# Need to review the Business Continuity Plan?

At one time or another, doubt can happen.

You refused to design continuity plans. Do you believe you were right to do so? otherwise

You set a perimeter of your BCP project. Is it correct?

You have excluded the financial aspects of your impact assessment. Is it relevant?

An important audit will be performed on your business continuity management system. What are its weaknesses?

Sooner or later the question will arise and you will need the advice of a competent person.

## Our offer

We propose to perform for you a light assessment also called blank audit.

All the work will be performed during a single meeting of 2 to 3 hours. Our consultant will review your business continuity history, steps of your business continuity project and key deliverables.

Your results will be shown on a scorecard (dashboard) which will be given at the end of the interview.

A light assessment report will be sent by email within a few days. It will show your results, your strengths and weaknesses.

Remark: This is not an audit. The report does not contain any recommendation for improvement unless specific request from the customer to be considered on a case by case basis. The documentation will not be reviewed and the evaluation will be based on the client's responses to questions from the consultant.

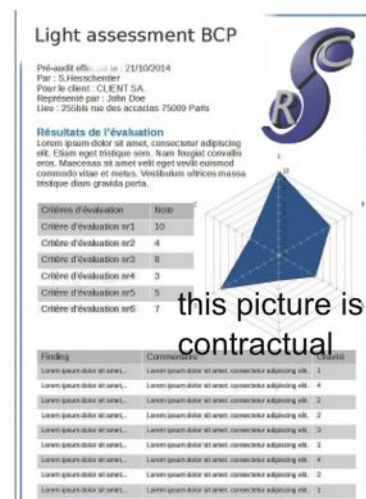

## Your deliverable

A synthetic light assessment report of 1 or 2 pages will be provided.

It will be written in French or English.

It will be sent by email in pdf format.

It will be enabled within 1 week.

# Our price

600 Euros.

Taxes are not included.

Travel expenses are included in the Paris region.

A 20% discount applies if the maintenance is performed remotely via Internet (Skype or equivalent).

This amount may be deducted from any future order to improve your management system business continuity.
